USING THE EARTH'S RENEWABLE ENERGY

Ground Source Heating & Cooling for Residential and Commercial Properties

Latest Technologies, Economic Advantages,
Environmental Impacts and Regulations

Presented by

American Ground Water Trust

16 Centre Street, Concord, NH

Ground Water Information, Awareness & Education Since 1986

Thank you to our Sponsors

ClimateMaster

WaterFurnace

Energy Efficient Resources

Boart Longyear

Baroid

In Cooperation with:

Geothermal Heat Pump Consortium
International Ground Source Heat Pump Association
Minnesota Water Well Association

Forum Date:

Wednesday, September 17, 2008 - 8:00 am - 4:45 pm

Forum Hotel:

Holiday Inn St. Paul East

2201 Burns Avenue, St. Paul MN 55119-6667, Telephone: (651) 731-2220

CONTINUING EDUCATION CREDITS - CALL 603-228-5444 FOR DETAILS

ARCHITECT CREDITS - 7.25 LUs (HSW) THROUGH THE AIA
AMERICAN SOCIETY OF HOME INSPECTORS - 7.0 ASHI® CE CREDITS
OTHER CEUS - CALL FOR UPDATES

What's It All About?

Today's ground source heating and cooling (GSHC) technology provides a proven method for saving significant amounts of energy for heating, cooling and hot water generation for ANY application. Thousands of homes, businesses and manufacturing plants across the nation are already taking advantage of these energy-efficient conditioning systems. GSHC systems operate at significantly lower costs than traditional gas, oil or electric-based installations. National benefits from geoexchange installations include less demand for energy generation capacity, reduction in green-house gas emissions and a reduced dependence on imports of oil and other fossil fuels.

By definition, installation of ground source systems involves accessing the sub-surface by either excavation or by drilling vertical bores. Because the sub-surface heat-exchange process occurs near or beneath the ground water table, environmental and water resource regulatory questions about design and installation have been raised in some states.

This one-day program will:

- Define the "state of the art" in terms of design options and economic pay-back
- Demonstrate the environmental and strategic benefits of the technology
- Dispel common myths about the effectiveness, reliability and safety of ground source systems
- Explain industry-accepted installation, operation and maintenance practices
- Provide an update on state, local and regulatory oversight recommendations

Questions to be considered include:

- Are there any environmental or economic risks associated with this technology?
- Are there data that clearly demonstrate risk cause and effect?
- Do design and installation standards provide adequate environmental protection?
- Should specific professional training be required for the below-ground system installation?
- Which agencies should, or do, have, regulatory oversight for heat exchange installations?
- What are the barriers to widespread adoption of the technology for new buildings or for homeowner retrofit? What can be done to eliminate these barriers?

The Forum program draws on the experience & expertise of industry and agency professionals and will provide a unique opportunity for exchange of information among policy makers involved in energy issues and specialists involved with the design, construction and permitting of ground source geoexchange systems for cooling and heating.

Who Should Attend?

This program will be of interest to professionals who design, install, inspect, approve, recommend or regulate these systems. This technology has the potential to become the technology of choice among those considering "green energy" alternatives for commercial or residential installations.

Energy company engineers, architects, planners and conservation commissioners, building code inspectors, environmental health professionals, home inspectors, water well contractors, HVAC professionals, real estate agents, home builders and developers, town officials (Conservation, Zoning, Planning), water testing specialists should not miss this opportunity to get up to speed with this technology. It will be coming to a building near you!

American Ground Water Trust

The American Ground Water Trust is a national not-for-profit public education organization. The Trust's mission:

- ◆ Promoting efficient and effective ground water management
- ◆ Communicating the environmental and economic value of ground water
- ◆ Showcasing ground water science and technology solutions
- ◆ Increasing citizen, community and decision-maker awareness
- ◆ Facilitating stakeholder participation in water resource decisions

Forum Program

7:30 – 8:00 am **REGISTRATION AND CEU SIGN-IN**

8:00 – 8:20 am **INTRODUCTION**

Garret W. Graaskamp, P.G., Hydrogeologist, American Ground Water Trust, Concord, NH

- Concept of Resource Sustainability
- Ground Water and Geologic Considerations

8:20 – 8:40 am **MINNESOTA'S ENERGY POLICY -
GROUND SOURCE INITIATIVES OVERVIEW**

Janet Streff, Manager, Office of Energy Security, St Paul, MN

- Overview of Minnesota's Energy Initiatives
- Minnesota's economic perspective of reducing electrical energy demands and the need for infrastructure investment
- Potential impact of geexchange technology on Minnesota's energy security
- Ground Source technology impact on Minnesota's efforts to reduce CO2 emissions

8:40 – 9:30 am **THE STATUS OF THE "GEOTHERMAL" INDUSTRY**

John Bailey, Senior Vice President, ClimateMaster, Oklahoma City, OK

- Geographic distribution of geothermal installations, nationally and in Minnesota
- Trends in the growth of geothermal applications
- Market potential and market predictions for the geothermal industry
- How the Geothermal industry is organized nationally, regionally and locally
- What appear to be the barriers to greater acceptance of geothermal installations?

9:30 – 9:45 am **NETWORKING BREAK**

9:45 – 10:35 am **GROUND SOURCE EARTH COUPLING DESIGN PRINCIPLES**

Jack Henrich, President, Bergerson-Caswell, Inc., Maple Plain, MN

- Explanation of the methods:
 - Closed loop – vertical, horizontal (slinky)
 - Open system – to surface, to diffusion
 - Heat exchanger systems for surface water (ponds and lakes)
- Weighing positives and negative aspects of each earth coupling method
- Design considerations for geothermal wells in bedrock vs. shallow sand & gravel wells
- What makes one well more efficient than another for thermal transfer?
- Common misconceptions about the geothermal earth coupling

Forum Program (continued)

10:35 – 11:25 am GROUND SOURCE HEAT PUMPS - THE FUNDAMENTALS

Jim Cusack, General Manager, UMR Geothermal, Maple Plain, MN.

- Understanding the basic physics of the heat transfer process
- Explanation of terminology (geoexchange, geothermal, ground source, BTUs, tons etc.)
- How the heat exchange process works for heating and cooling
- What happens to the heat transferred underground – are there any risks?
- How to measure the efficiency of geothermal systems
- Primary differences between geothermal and traditional HVAC applications
- What should a home inspector, Realtor or prospective purchaser look for?
- Application of ground source heating and cooling systems in Minnesota

11:25 – 11:45 pm MINNESOTA'S LEGISLATIVE CLIMATE: GROUND SOURCE HEAT PUMPS AND ALTERNATIVE ENERGY RESOURCES

State Senator Rick Olseen - (DFL) District 17

Vice Chair - Senate Finance Committee - State Government Budget Division

Member - Senate Energy, Utilities, Technology and Communications Committee

11:45 – 12:45 pm LUNCH (Provided on site)

12:45 – 1:30 pm GEOEXCHANGE WELL CONSTRUCTION for THERMAL EFFICIENCY and ENVIRONMENTAL PROTECTION

Bob Thein, Principal, Thein Well Company, Rochester, MN

- Review of typical Minnesota installations. Is there a “good, better or best” type?
- The basis for selecting installation materials (well casing, grout, propylene glycol, methyl alcohol. etc/)
- Use of an existing well for a geothermal application. Can it be done?
- How does a ground source heat pump well differ from a drinking water well?
- Common problems that can result from installation errors
- What to do if a closed loop develops a problem, etc.

1:30 – 2:20 pm ECONOMIC SUCCESS STORIES – THE PAYBACK - Residential, Commercial and Industrial

John Preston, Territory Manager, WaterFurnace International, Inc. Indianapolis, IN

- How to do the short-term and long-term math on energy saving vs. installation cost?
- What is the typical payback period and Return on investment (ROI)?
- How do geothermal installations add equity value to a property?
- What are the typical servicing and maintenance needs and costs for a geothermal system?
- What is the relationship among architect, system designer and installer? (Who is selling to whom?)
- Case studies of installation and operation in Minnesota (homes, churches, schools, offices etc.)

2:20 – 2:35 pm NETWORKING BREAK

Forum Program (continued)

2:35 – 3:15 pm

GEOEXCHANGE SYSTEM INSTALLATIONS The LEED PERSPECTIVE

James Keller, Past-President Mississippi Headwaters Chapter of the US Green Building Council, and Sustainable Design Partner at Gausman and Moore Associates, St Paul, MN

- What is Leadership in Energy and Environmental Design (LEED)?
- Overview of the various Green Building rating systems:
- Overview of the LEED rating systems - Commercial vs. Residential
- How is a building's heating and cooling system (energy-use) evaluated in the LEED rating system?
- How do Ground Source Heating and Cooling systems achieve LEED rating points?

3:15 – 3:55 pm

LARGE-SCALE GEOTHERMAL INSTALLATIONS: PROSPECTS FOR GROWTH

Scott Rollings, President-Elect, Minnesota Chapter of ASHRAE, and CEO of Energy Efficient Resources, Blaine, MN

- Regulatory and permitting issues
- System Aesthetics – Less means more
- Design criteria for large heating and/or cooling demands
- How ground/site conditions impact ground heat exchanger design and application
- Ground source heat pump system economics
- Environmental considerations: Installation and Operation
- The Economics of Efficiency
- System Performance

3:55 – 4:35 pm

GEOEXCHANGE INSTALLATIONS STATE and LOCAL RULES and REGULATIONS

Michael Convery, Supervisor, MN Department of Health, St. Paul, MN

- Health concerns from installation and/ or operation of geothermal systems
- Environmental & water resources concerns from drilling, heat exchange or well failure
- Current regulatory requirements in Minnesota
- "Paperwork" burden for installation of a geothermal system
- Perception of "risks" to the integrity of ground water or aquatic environments
- In what instances do drinking water regulations apply to geothermal wells?
- Licensing requirements for geothermal well and heat-exchange equipment installers

4:30 – 4:45 pm

WRAP-UP AND ADJOURN

- Further Questions and CEU sign-out

Registration Form

Ground Source Heating & Cooling for Residential and Commercial Properties Latest Technologies, Economic Advantages, Environmental Impacts and Regulations

DATE: Wednesday, September 17, 2008, 8:00 am - 4:45 pm
LOCATION: Holiday Inn St. Paul East, 2201 Burns Avenue, St. Paul MN 55119-6667
Telephone: (651) 731-2220

	CHECK BOX
PRE REGISTRATION (GENERAL)	\$175 <input type="checkbox"/>
PRE REGISTRATION (TRUST CORPORATE MEMBERS)	\$150 <input type="checkbox"/>
ON-SITE REGISTRATION	\$200 <input type="checkbox"/>
EXHIBIT TABLE (DOES NOT INCLUDE REGISTRATION)	\$200 <input type="checkbox"/>

(Registration includes workshop handouts, coffee breaks and lunch)

PAYMENT: Check *[Make checks payable to: American Ground Water Trust]*

AMEX Visa MasterCard PO

Credit Card or PO No. _____ Expiration _____

Cardholder Name _____

Registration Name _____

Title/Position _____

Company/ Organization _____

Return by fax: (603) 228-6557 Register on line: www.agwt.org

CANCELLATION POLICY

- Cancellations received in the Trust office by 5 pm ET 15 days prior to event will be granted a full refund less \$25.
- Cancellation 14 days or less, prior to the event will receive a 50 % refund.
- Cancellations on the day of the event are considered "No Shows."
- Refunds will not be granted for "No Shows" (substitutions gladly accepted).
